Details

Description

The connection kit is an expansion kit for the Kärcher Rain System® efficient watering system and contains 4 T-pieces, 4 I-pieces and 5 end pieces. The T-piece connects three Kärcher Rain System® hoses or soaker hoses together, the I-piece connects two. The lateral tee of the T-piece is volume-adjustable and thus pressure-adjustable and is ideal for connection of the soaker hose. The I-piece is most suitable for affixing the soaker hose to the end of the Kärcher Rain System® hose or to connect two Kärcher Rain System® hoses. With the help of the end piece, the laid or shortened hoses can be sealed at any point. Installation of the hoses does not require tools and is extremely easy: The hose is simply pushed onto the connection or end piece and fixed with the aid of the union nut. The Kärcher Rain System® can be adapted to almost any garden and works perfectly with the SensoTimer for need-based watering control.

Application

- Garden watering
- Flower beds, vegetable patches, hedges, bushes
-

Features & Benefits

Extension kit for the Kärcher Rain System®

Extension of the Kärcher Rain System®

T-piece with adjustable lateral tee

Targeted and need-based watering of plants.

Lateral tee as an ideal soaker hose connector

T-piece with three connections

Easy connection of Kärcher Rain System® hoses and soaker hoses

Hose stop

Convenient sealing of the Kärcher Rain System® hose or the soaker hose

I-piece with two connections

Easy connection of Kärcher Rain System® hoses and soaker hoses

Ergonomically shaped

Easy to use
